

# Broomfield Xeriscape Demonstration Garden

## Pollinator Garden

**Xeric Level:** 

**Irrigation:** This garden is irrigated with an underground irrigation system called Netafim.

**Mulch:** The mulch used in this garden is from the City and County of Broomfield's tree recycling program. It is applied at a depth of 2-3 inches to curtail weed growth. No weed fabric has been used under the mulch in order to promote the spread of the plants and to allow the mulch to break down and incorporate into the soil.
